\$100,000⁰⁰ BANK GUARANTEE BOND

Kalamazoo Stove Company

KALAMAZOO, MICH.

Know all men by these presents, that the Kalamazoo Stove Company, a Michigan Corporation of the City of Kalamazoo, in said State, is held and firmly bound unto the First National Bank, a National Banking Corporation of the city aforesaid, in the sum of One Hundred Thousand Dollars (\$100,000) lawful money of the United States of America, to be paid to the said First National Bank, its successors or **its assigns** for the benefit of the purchasers of cabinets, tables, stoves, ranges and furnaces from said Company.

For which payment to be well and truly made, the said Kalamazoo Stove Company binds itself, its successors and **assigns** jointly and severally, firmly by these presents.

The condition of this obligation is as follows:

Whereas the said Kalamazoo Stove Company has and does agree as follows with its customers:

1st—That every cabinet, table, stove, range or furnace, listed and described in its catalog is of its own manufacture unless otherwise specified, and shall be sold direct at actual factory prices.

2d—That every cabinet, table, stove, range or furnace, of its manufacture shall be perfect in

workmanship, shall be made of the best procurable materials, and shall operate successfully when the simple directions for setting up and operating, which it sends with each, are followed with ordinary care.

3d—That every customer shall have a preliminary trial of 30 days' duration of every cabinet, table, stove, range or furnace he purchased, during which trial period the purchase price shall be held in trust either by it or by some bank which the purchaser may select.

4th—That even after the expiration of the preliminary trial, the purchaser shall have a still further approval test of his purchase, for it does hereby agree—and make this agreement a part of every transaction between this Company and all purchasers—that should the cabinet, table, stove, range or furnace purchased develop, at any time within 360 days from the date of shipment, any imperfections due to any fault in the materials or the construction of the same, it will either correct and rectify the fault to the purchaser's satisfaction, or else upon the return of the article purchased, will return the purchaser the full amount of money he paid it, said Stove Company in all cases paying all railway freight charges.

Now, therefore, if said Kalamazoo Stove Company shall in any way fail to carry out said agreement, then this bond shall take effect, and the said First National Bank is authorized to return to the purchaser his or her purchase money, in case the Company shall not refund it in accordance with said agreement.

You Know What

“Kalamazoo Direct to You” Means

KALAMAZOO Kitchen Kabinets are made from start to finish in the factory that manufactures all the Kalamazoo Stoves, Ranges and Furnaces.

Nearly 300,000 men and women in 31,000 cities, towns and villages have bought Kalamazoo Kitchen Kabinets, Stoves, Ranges and Furnaces on the “Kalamazoo Direct to You” plan. The fame of “Kalamazoo Direct to You” has gone round the world!

Our factory is one of the largest, most modern and best equipped plants in the United States. We have everything here operating on a large scale for the production of the kabinet—sheet-steel department, all departments of construction, enameling department, etc. Manufacturing on such an enormous scale as we do, we are enabled to buy raw materials at the lowest price, and to manufacture on a small margin of profit on each kabinet. You get the benefit.

If you are ever in Kalamazoo be sure to come and see our plant; you will find it worth while.

How We Came to Manufacture the Kitchen Kabinet

Our long experience in the manufacture of stoves and ranges, and dealing direct with the users, has given us exceptional knowledge of kitchen needs.

This knowledge has been re-enforced by many calls every year from our old customers for a kitchen kabinet. Through them, and through extensive investigation of our own, we have thoroughly learned the shortcomings of all the ordinary cabinets.

The Need for an All-Metal Kabinet

As the result of our investigation, and the advice of this army of experienced housewives, one of the first things of which we were absolutely convinced, was the need of an All-Metal Kabinet.

No other place on earth puts a piece of furniture to such an extreme test as the kitchen.

Your kabinet is subjected to go-in-the-shade heat of baking day. It is subjected to the cold of below-zero winter nights. It is constantly attacked by the steam from cooking vessels and wash boilers.

No wonder wooden cabinets swell, shrink, warp, twist, crack, and pull loose at the joints in a short time. No wonder the finest wood finish peels off and it becomes an unsightly object. The wood collects the dampness and starts mold on cake, bread and other food. The wood kabinet is an invitation to rats, mice, cockroaches, ants and vermin—entrance becoming easier as the cracks widen. Its crevices, cracks and porous surface collect dirt and germs that you never can clean out.

You want a kabinet not for one, two or three years, but for a lifetime. Only enameled steel can withstand the effects of daily kitchen use and give you lifetime service.

30 Days' Free Trial

A Step in Advance

So the need of an all-metal kabinet to overcome these difficulties put it "up to us." Our immense facilities for manufacturing Kalamazoo Stoves, Ranges and Furnaces enabled us to produce a kabinet of the highest quality with the greatest economy.

We determined, however, that before we should offer a kabinet it should not only be the latest in convenience, durability and beauty, but a step in advance of all cabinets—a fit companion to our stoves and ranges.

You will be interested first in the Kalamazoo Kitchen Kabinet as the latest and best of all kitchen labor-savers—a "life-saver" as some delighted users write us. You will see the value of its many exclusive features.

But we believe you will be equally interested in the kabinet's everlasting construction which is also described in detail in the following pages.

YOUR IDEAS ARE VALUABLE TO US

Many of our customers have given us ideas from which we have developed some of our most popular products.

Please let us have any suggestions that occur to you.

Kalamazoo Kabinet Direct to You

30 Days' Trial

360 Days' Approval Test

The "Kalamazoo Direct to You" plan which has made us so many friends and regular patrons for our stoves, ranges and furnaces is applied to the Kalamazoo Kitchen Kabinet.

You buy the kabinet direct from our factory. You save the expense of the manufacturer's traveling men, the profits of the jobber, the jobber's expenses for handling, the expenses of the jobber's salesmen, the dealer's expenses for store rent, light and heat, and the salary of his salesmen. You save his charges for losses. All these expenses are taxed proportionately on the kabinet sold at the retail store. You cut them all out by buying your kabinet direct of the Kalamazoo Stove Company.

You buy the Kalamazoo Kitchen Kabinet on our 30 days' trial, and our 360 days' approval test. You have the use of the kabinet every day for a year before you make your final decision. If any flaw or defect appears in the kabinet in that time, we will adjust the matter to your entire satisfaction, or you can ship back the kabinet, and we will return your money.

Backed by \$100,000 Bank Bond

On page two we give you in full the \$100,000 bank bond guaranty, which backs our 30 days' trial and 360 days' approval test. You never saw such protection offered you before on any other kitchen kabinet.

The Arrival of the Ideal "Servant"

Kabinet Carefully Crated to Reach You in Perfect Condition

No matter what distance the Kalamazoo Kitchen Kabinet has to come to you, every precaution is taken to insure its arrival in perfect condition. It is firmly packed with excelsior pads, in a special crate designed to protect it perfectly from rough handling, and covered with heavy corrugated cardboard to keep it from contact with any other article of freight, on its way. Long experience has made us experts in the packing of our goods for safe delivery. We guarantee your Kalamazoo Kitchen Kabinet to arrive in just as good order as when it left our shipping department. Shipment is made to you promptly.

You Sit at Your Work

You Get Your Kabinet at a Saving of \$5 to \$20

Buying direct from our factory, you get the Kalamazoo Kitchen Kabinet at the wholesale factory price—a clean saving of \$5 to \$20 from the price of any dealer's cabinet even worth comparing with the Kalamazoo.

Of course there are cheap cabinets—wooden ones—poorly constructed, that warp, crack and become unfit

for use in a little while. It is the worst sort of extravagance to buy such a cabinet—a sheer waste of money, with trouble from the start.

When you buy a Kalamazoo Kitchen Kabinet, you get an all-metal, white-enameled kabinet, germ-proof, vermin-proof, moisture-proof, built for a lifetime of satisfactory service.

Just remember this when you compare the prices of cabinets.

Your Workshop Before You

No jumping up and down—no trotting to and fro for this and that. It makes kitchen work a real joy.

Cash or Easy Payments

The Kalamazoo Stove Company is the leader of all in the liberality of its easy-payment plan. Thousands have bought Kalamazoo Cabinets, Stoves, Ranges, Gas Stoves and Furnaces on our special arrangement for deferred payments—making it so easy that the cost is not felt.

You can have a Kalamazoo Kabinet in your kitchen at once—have the kabinet working for you every day—and pay for it in easy monthly payments, if you so desire. You will find full details of our factory credit plan on the order sheets in the back of this book.

We Pay the Freight

In order to give you a perfectly clear comparison between our price and your local dealer's price, we pay the freight ourselves. So you need not bother at all about freight charges.

You will note this difference between us and catalog houses or mail-order jobbers who tell you that the freight charges will be small, but who do not offer to pay them. We put the Kalamazoo Kitchen Kabinet down at your railroad station all freight charges paid by us.

Everything At Your Finger Tips

Work Always Costs Money

NO MATTER who does it. Every bit of labor is just so much expense to somebody—in time and strength if not in wages. So you who do your own work or supervise it should remember that with every extra motion and every unnecessary step you are running up a bill which must be paid some day.

This is the hardship imposed on the great majority of women, who have had to use kitchens which they had no voice in planning—kitchens that seem to have been planned as labor *makers*—certainly not labor savers. So women have had to go through the most trying labor of cooking and cleaning every day, losing strength and health under the constant strain, wasting vitality in coping with adverse conditions which a man would never permit in his workshop.

Happily, these conditions are changing. More than a million women in the United States now have kitchen cabinets. True, most of these are just cabinets designed a great many years ago, not equipped with the many wonderful labor-saving conveniences, nor anywhere nearly so beautiful and durable as the all-metal, white-enameled, nickel-trimmed Kalamazoo Kitchen Cabinet.

Here, then, is the Kalamazoo, the world's latest triumph in kitchen service—all ready to ship to you.

You sit down comfortably, with your whole kitchen workshop right at your finger tips—three roomy cupboards, pantry, bins, compartments, and work-saving devices all within easy reach. In this compact workshop there are places for hundreds of utensils and cooking materials.

It saves trotting to and fro to gather up this thing and that, to prepare the food. Without leaving your chair or stool, you have within easy reach every bowl, pan, ladle, beater, chopper, knife, fork, or spoon you want to work with. You have the "sugar and spice and all things nice" that go into the tempting dish, bread, cake, or pastry that you are going to make. They are all right there before you. No jumping up and down a dozen times to collect them.

And you have a broad, roomy, polished "work-bench"—the Kalamazoo Nickeloid Sliding Table

Top—so clean and so easy to keep clean that it makes the most critical housewife's eyes sparkle with delight.

A world of work and worry vanishes from the kitchen when the Kalamazoo Kitchen Cabinet comes in.

There is a place for everything in the Kalamazoo, and everything just naturally goes into its right place in the cabinet. Once you have put the Kalamazoo Kitchen Cabinet into your kitchen, you would no more think of trying to keep house without it than you would think of trying to do without a stove or range.

So Easy to Have

If You Live in a Large House

Especially one of the houses with large old-fashioned kitchens, the Kalamazoo Kitchen Cabinet saves you literally *thousands* of steps each day.

It does away forever with the long trips back and forth to your flour in one place—your sugar and salt and baking powder in another—your eggs in another—your spices in another—your bowls, egg beater, knives, spoons and forks in another—wherever you have to keep these things in a big kitchen without any special plan or equipment for convenience. Only a woman who has traveled all day long on baking day or hours in getting up a big dinner or in cooking the three meals a day for the family knows what this means. And to think that it is all so unnecessary—that you could end it right now if you had the Kalamazoo Kitchen Cabinet in your kitchen, almost *handing you the things*.

If You Live in a Small House

or in an apartment, the Kalamazoo Kitchen Cabinet solves the space problem. "Nowhere to put things" is a trouble that means as much jumping up and down, work and worry in other ways as the old-fashioned too-big kitchen.

The Kalamazoo concentrates all your tools and materials, keeps them where you are always sure of finding them—and economizes your needed space so that with the kabinet the little kitchen becomes a daily delight.

No crowded, cluttered pantry to discourage you when you start baking or the preparation of a meal. Just a clean, cool kabinet with its white enamel and shining nickel and glass—something so beautiful and so orderly that you will invite your guests to come out and see.

Is it any wonder that every owner of a Kalamazoo Kabinet is enthusiastic?

You Would Never be Satisfied With an Ordinary Cabinet

after seeing the roominess, the convenience, the beauty and the great sanitary advantages of the Kalamazoo.

Our kitchen kabinet goes with the world-wide movement for better sanitation in which progressive housewives are taking the lead. And where is scrupulous sanitation more imperative than in the kitchen where our foods are prepared? Health experts will soon have everybody awake to the superiority of the all-metal, smooth, enameled, practically jointless Kabinet like the Kalamazoo.

The handsome, shining, nickeloid top, which slides in and out according to the room you need, invites you to the pleasant task of cooking or baking—with everything where you can reach it without leaving your seat.

MUCH SUPERIOR TO WOODEN CABINETS

Flint, Mich., Nov. 24, 1914.

Kalamazoo Stove Company

Gentlemen:—The all-metal enameled Kitchen Kabinet reached me a few days after the order was sent in. It easily takes first place among the kitchen furnishings. Mrs. Goering's own words: "The Kabinet is complete, sanitary, and a practical piece of kitchen furniture. Quite easy to clean and much superior to the wooden kind."

We have shown the Kabinet to our friends and they say it is the best ever.

DR. GEORGE R. GOERING

CAME IN FINE SHAPE—VERY SATISFACTORY

De Ruyter, N. Y., Nov. 2, 1914.

Kalamazoo Stove Company

Dear Sirs:—The Kabinet came in fine shape and have it put up and it is very satisfactory.

MARY A. HOLLENBECK

NOT A BRUISE OR SCRATCH—MOST COMPLETE PIECE OF FURNITURE

Sanford, Fla., Nov. 10, 1914.

Kalamazoo Stove Company

Dear Sirs:—The Kitchen Kabinet came in perfect order—not a bruise or scratch on it. We have set it up and are taking great comfort from the use of it. The Kabinet is all that you claim for it, and I take great pleasure in saying to you that we are more than pleased with it. It is the most complete and perfect piece of furniture we have ever seen and we take great pleasure in showing it to all our friends. We also take pleasure in bearing testimony to the quality of your goods.

ED. PUTNAM

NOT EVEN \$50 ONES APPROACH IT

2110 Michigan Ave., Chicago, Nov. 21, 1914.

Kalamazoo Stove Company

Dear Sirs:—I ordered your Kabinet rather out of curiosity as I had not noticed any **all-metal Cabinets** in the Chicago stores. I have looked over some six or seven makes but must say I have seen nothing in any of the Chicago stores that approaches your product and I looked at some fifty-dollar ones, too. It ought to be safe to send them out to anyone on approval. Enclosed find draft to cover.

R. S. WILTROUT

On Easy-Payment Plan

How You Spend More Than a Kabinet Costs

THE Kalamazoo brings you so *many* things that you need for your kitchen work—the flour bin—the sugar container—the patent dough and bread board—the eight-piece crystal set for coffee, tea and spices—white glass rolling pin—the bread and cake box—all included in the one low factory price.

Buying such equipment piece at a time—as you do now, if you keep your kitchen furnished for work at all—you spend more than enough to pay for the kabinet **and you do not have the kabinet.**

Why not stop this sort of expense once and for all, by ordering the Kalamazoo with equipment complete—the equipment you need—the place provided for everything—and a place to do your work with ease and dispatch.

Read the letters of delighted users which we print in this book. These are a few of the many that come to us. Mr. Putnam says: "It is the most complete and perfect piece of furniture we have ever seen—a great comfort."

Mr. Wilttrout says: "I have seen nothing in the Chicago stores that approaches it—and I looked at some \$50 ones, too."

Mr. Stevens says: "The kabinet is entirely satisfactory to Mrs. Stevens and is admired by all who have seen it." You notice that the men are just as enthusiastic as the women.

Without Lower Doors on Upper Section

This is exactly the same as the kabinet complete shown on pages 1 and 5 without lower doors on the upper section. Has the same equipment. Eight-piece crystal glass containers, opaque white glass rolling pin, metal moulding board, sugar container, flour bin and bread box.

| Catalog No. | Height to Top of Closet | Height to Top of Table | Width | Length |

| Y-50 | 66 Inches | 31½ Inches | 26 Inches | 40½ Inches |

FOR PRICES see list inside Back Cover

360 Days' Approval Test

You Can Have Your Kabinet Now

YOUR all-metal, white-enameled kitchen kabinet is waiting for you at wholesale factory price—a saving of \$5 to \$20 over ordinary kitchen cabinets. (See prices on inside of back cover.) You receive it on our 30 days' trial plan—our 360 days' approval test—backed by our \$100,000 bank guaranty—cash or easy terms—and we pay the freight. (See the order sheets

in the back of the book for details as to ordering and our cash and credit plan.)

You can take eight months to pay for it, if you do not wish to pay the full price at once. We want every housewife to know what the Kalamazoo will do in her own kitchen.

That, after all, is the only way to realize the blessed relief from drudgery which it brings, so we offer our liberal easy-payment plan that nobody need delay. If you send the full price with your order, as many of our customers do, you save us office work and book-keeping costs, and we can quote you a slightly lower price. But whether you buy on time or for cash, you save \$5 to \$20.

This illustration affords fine view of roomy cupboard below and pantry above

Even Your Market List Provided For

The Kalamazoo Market Memo that comes with your kabinet is one of the little conveniences that you will use every day. It does your remembering for you. Special design with convenient hanger.

QUEEN OF THE KITCHEN

Niagara Falls, N. Y., Dec. 31, 1914.
Dear Sirs:—My Kalamazoo Kitchen Kabinet arrived yesterday and we put it to work at once. You may say for me that your Kabinet is the Queen of the kitchen, the same as the piano is King of the parlor.
S. W. DETT

FINDS IT A GREAT BEAUTY

Cressona, Pa., Dec. 26, 1914.
Dear Sirs:—I have just received my Kalamazoo Kitchen Kabinet and I am surely pleased to find it such a beauty. I am more gratified than I can express. I will be pleased to recommend the Kalamazoo to any one.
MRS. WILLARD WEAVER

Never Can Warp, Buckle or Sag

Kalamazoo Steel Kabinet Built to Frames of Solid Steel Angles and Bands

THE Kalamazoo Kitchen Kabinet is made of open-hearth steel, the most durable of all steels for the purpose.

The steel sides, back, top and bottom of each section are welded to a frame of solid steel angles and bands. The design being drawn from this open-hearth steel by special machinery and dies, the steel sides of both the upper and lower sections carry the same pleasing panel design that you see on the doors.

This design not only adds to the beauty of the kabinet but adds great rigidity and strength to the construction.

These solid steel angles and bands are themselves electrically welded together, so that each frame becomes actually one piece. Electric welding, as you probably know, *fuses the metal* at the point of contact, so that it intermingles and unites so perfectly there is no joint. When it cools it is a continuous union of the metal.

This makes our kabinet frame so rigid and so strong that you could pile a ton on it without causing it to twist, bend, warp, buckle, or sag.

The picture on this page of men standing on Kalamazoo Kabinet framework is from an actual photograph.

Each Section Actually One Piece

To these one-piece frames, the sheet steel sides, front, back, top and bottom of each section are electrically welded, *thus making each whole section one piece.*

This welding process is what is known in metal science as electrical spot and butt welding.

So far as we know, the Kalamazoo Kabinets are the only cabinets in the world in which this construction, with *complete framework of steel angles and bands* is used.

The upper and lower sections are bolted together with six heavy bolts through nickel finished plates of pleasing design.

Rigid Construction of the Doors

We are especially proud of the construction of the Kalamazoo doors.

Each of these doors is re-inforced by a lining of steel (18 gauge on 24 gauge steel, electrically welded). To this double strength is added the re-enforcement of the panel design which gives a rigidity that will never yield to moisture, heat, cold or the hardest use.

Kalamazoo Kabinet doors close up perfectly and always fit perfectly. You will never see wide spaces at top, sides or bottom, where the doors of ordinary cabinets are bent awry, admitting dust, steam and insects.

Our spring door catch is also a specially convenient feature. When your fingers are covered with flour or grease you can always close any of the Kalamazoo doors. You are not baffled by a knob that has to be turned, as with the door catches of ordinary metal cabinets.

Kalamazoo is Fire-Proof, Moisture-Proof, Germ-Proof, Dust-Proof

The Kalamazoo affords you and your cooking materials real protection. Being of solid all-metal, it is absolutely fire-proof. You can keep your matches in your Kalamazoo, and mice can never get to them to start a blaze. Even if the matches should burn by spontaneous combustion, as sometimes happens, the fire could not burn through as with wood. It would be smothered out inside.

With its tight construction, the Kalamazoo is positively moisture-proof—dust-proof—germ-proof—and proof, in fact, against any or every pest that invades the kitchen.

Ordinarily metal cabinets are put together with rivets or soldered seams where the metal joins. In time these seams are certain to loosen, crack or spring apart.

This can never happen in the one-piece construction of the Kalamazoo even in generations of service. No rivets or solder are used in the Kalamazoo.

The steel bands electrically welded to the angles make an equally solid and rigid frame for each of the drawers.

That is one reason why the Kalamazoo drawers always fit their places, always slide in and out easily. The kabinet holds its shape perfectly, and has the utmost protection at each point.

Reduces Necessary Work

Kalamazoo Section Kabinet

THE Kalamazoo Section Kabinet corresponds with the lower section of the complete Kalamazoo Kitchen Kabinet. It is all metal, double white enameled inside and out.

With this kabinet you can sit down at your work; it also takes the place of the kitchen table, and has the added conveniences of the drawers for knives, forks and tea towels, and the roomy cupboard for pots, pans and kettles underneath.

We call special attention to the spacious nickeloid table top of the Kalamazoo Section Kabinet. It has a mirror finish and is the easiest to clean and keep clean. No finer or more sanitary work bench can be imagined. Notice the white enamel shelf built up at the back of the nickeloid top.

This nickeloid top slides forward to give you wide working room, just as in the complete kabinet, and the shelf stays in place, a convenient place for utensils and materials, while you use the full width of

the top to work on; when finished, slide the top back out of the way.

The bread, pastry and confectionery board and the white opaque glass rolling pin also come with our section kabinet. It saves labor and materials. Dough does not easily adhere to it. No scraping nor scouring is required.

The section kabinet stands on strong legs high enough to permit mopping or cleaning underneath. Large casters make it easy to move the kabinet anywhere. Glass water cups having dry islands on which to set the casters are furnished at 50 cents per set extra cost. These cups keep away ants.

Both wall and section cabinets are sold direct to you at low wholesale factory price—on 30 days' trial—360 days' approval test—backed by our \$100,000 bank bond guaranty—cash or easy payment plan. You can buy either the wall or section kabinet, and then make a complete Kalamazoo Kitchen Kabinet any time afterward by buying the other section.

| Catalog No. | Height to Top of Table | Height to Top of Shelf | Width | Length | Working Surface |
|-------------|------------------------|------------------------|-----------|------------|-----------------|
| Y-40 | 31½ Inches | 34 Inches | 26 Inches | 40½ Inches | 24x39 Inches |

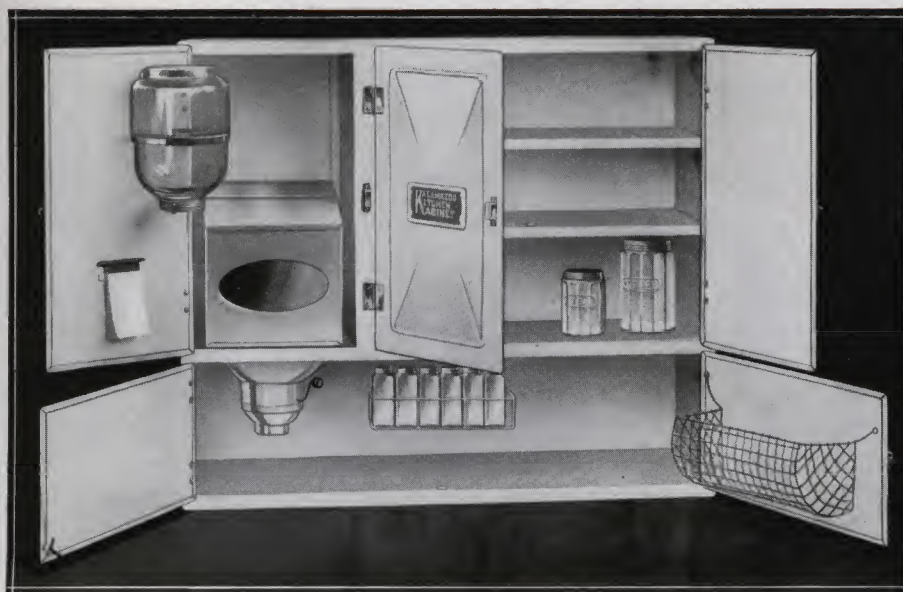

FOR PRICES see list inside Back Cover

Abolishes Unnecessary Work

Kalamazoo Wall Kabinet

HEREWITH is shown the Kalamazoo Wall Kabinet.

It corresponds to the upper section of the complete Kalamazoo Kitchen Kabinet (the part above the sliding table top) and is intended to be fastened directly to the wall, or set on a shelf or ordinary table. The Kalamazoo Wall Kabinet is all metal, double white enameled inside and out. It has all the moisture-proof, dust-proof and lasting qualities of the complete kabinet. It comes equipped with the roomy upper shelves, the crystal sugar container, flour bin with spout, sifter, set of eight crystal containers, the basket, etc.

The wall kabinet fills a special need where the kitchen is very small and only wall space can be given up to the kabinet, or where for any reason it is not desired to put in the complete kabinet.

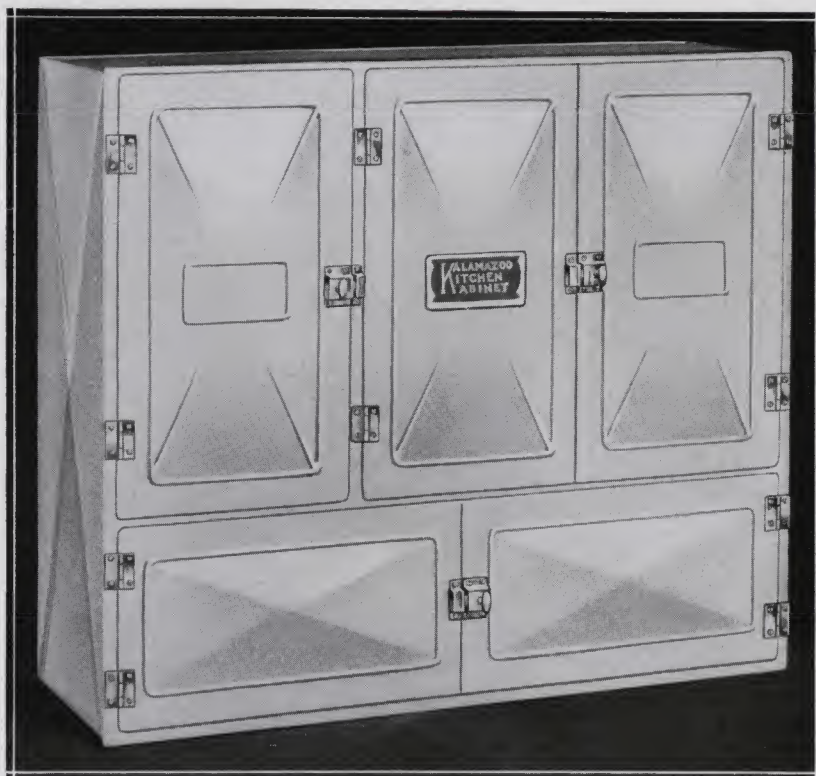

It is the safest and most convenient place in which to keep kitchen utensils, flour, sugar, coffee, spices and other cooking materials.

Having the same construction and finish as the kabinet complete, it will last a lifetime. You can buy this wall kabinet and make a complete kabinet any time afterward by buying the lower section.

An Ideal Built-In Kabinet

If you are building a kitchen or a house, you will find the Kalamazoo Wall Kabinet an economical feature. But it can easily be placed in any kitchen, old or new.

See page 29 for further suggestions regarding the use of this kabinet in your building plans.

| Catalog No. | Height | Width | Length |
|-------------|-----------|-----------|---------------|
| Y-30 | 36 Inches | 12 Inches | 40 1/2 Inches |

FOR PRICES see list inside Back Cover.

The Heirloom Kabinet

Kalamazoo Kabinet on Table Base

ON THE opposite page we show a model that is popular with those who do not need or care for the complete enclosed kabinet. This kabinet is made of the same materials, the same one-piece construction with the same finish as our leading model—all metal, white enameled, nickel trimmed, and built for life-time service.

It has the Kalamazoo's full width nickeloid sliding table top and full set of eight crystal containers.

The lower part of the kabinet is in the form of a table (also all metal, white enameled), with the two roomy upper drawers and a capacious shelf underneath. It answers the purposes of the kitchen kabinet, where the lower closed cupboard can be dispensed with, and is priced less than the leading model.

As shown on opposite page, this model is not equipped with the flour bin in the upper left cupboard. The regular Kalamazoo flour bin will be added, however, when ordered, at slightly higher cost.

White Enamel Gives Lasting, Beautiful Finish

It is impossible to picture the smooth, shining whiteness of the Kalamazoo's deep coating of enamel inside and out.

You have to see it in your own home to appreciate that it is a piece of furniture with a classic beauty of its own, fit for the mansion or the cottage—something you will be just as proud of in ten or twenty years as the day you first show it to your admiring friends.

Two coats of the finest white enamel are applied by patent process—and baked to the steel under high temperature. The bottoms and sides of the drawers, cupboards, and shelves are all covered alike on both sides with this clean, white, sanitary finish—a joy to the eye, a protection to the cooking utensils and supplies—a big reduction in cleaning labor for a lifetime.

SO EASY TO KEEP CLEAN

Kalamazoo Stove Company

Gentlemen:—Your Kitchen Kabinets are all you claim them to be. I am delighted with mine, so easy to keep clean, and besides, they are an ornament to any kitchen. Would not change for any other kind.

MRS. I. W. ELLENBERGER
300 Lake St., Topeka, Kan.

THE ADMIRER OF ALL ADMIRERS

Kalamazoo Stove Company

Gentlemen:—Our Kalamazoo Kitchen Kabinet is the "admirer of all admirers." During the latter part of September, 1914, we received one of your all-metal enameled kabinets, and can truthfully say that it is a useful beauty, greatly admired by all. We do not need to tell those who see it of its beauty and convenience, but just let it speak for itself. It is not for sale at any price.

MR. AND MRS. W. C. HASTIE
Carlisle, Iowa

SAVED \$18 BY BUYING KALAMAZOOS

Kalamazoo Stove Company

Gentlemen:—Received the all-metal, enameled Kitchen Kabinet from you. It is certainly a marvel of beauty and utility, and if as durable and satisfactory as the Kalamazoo Range purchased from you seven years ago, it will be simply perfection itself. Saved \$5.00 on Kitchen Kabinet and \$13.00 on kitchen range between our local dealer's price and yours. The range was the Kalamazoo Queen.

HENRY S. CLINK
Oxford, Mich.

Before the metal is put through the enameling process it is deoxidized—that is, it is made perfectly clean and free from the smallest particle of rust, corrosion, or stain. It is just as free from all foreign substances as the moment it left the furnace. This insures that the clear, smooth, white surface of the steel will give the enamel a lasting grip. It also insures that there will be no rust or stain to discolor the enamel.

When the thick, non-porous coating goes on the metal under our process it becomes part of the kabinet, so perfect is its contact. You will not find any thin, wavy, or rough places in the Kalamazoo enamel. It has a smooth, lustrous surface like white porcelain, and you can remove every particle of dirt with a damp cloth as easily as you can wipe a dinner plate.

Kalamazoo Panel Design

The illustrations but fairly convey the beauty of the Kalamazoo raised panel design. The design of the Kalamazoo Kitchen Kabinet is patented. No one else has it. This panel formation of sides and doors is an original and exclusive Kalamazoo feature. The strength and rigidity which it adds have already been noted in the description of the doors. These same advantages are added by paneling of the sides. It also gives pleasing lines to the kabinet, relieving it of the monstrous box-like character of the ordinary, plain, wood-hued cabinets you see in the stores.

All-Nickel Trimmings

The heavily nickeled trimmings are a pleasing feature. The hinges and catches of all the doors, the drawer pulls, legs, and the plates uniting the two sections are all nickeled. This means no rust.

Brightens the Kitchen

Complete Set of Crystal Containers Comes With Kabinet

Crystal Sugar Container

THE large crystal sugar container occupies the upper part of the left compartment in the upper section. It sits in a metal ring that swings in and out, making it easy to draw whatever sugar is needed from the bottom. It also swings out of the way when you want to take out or fill the flour bin below. The sugar container is dust-proof.

Eight Other Crystal Pieces

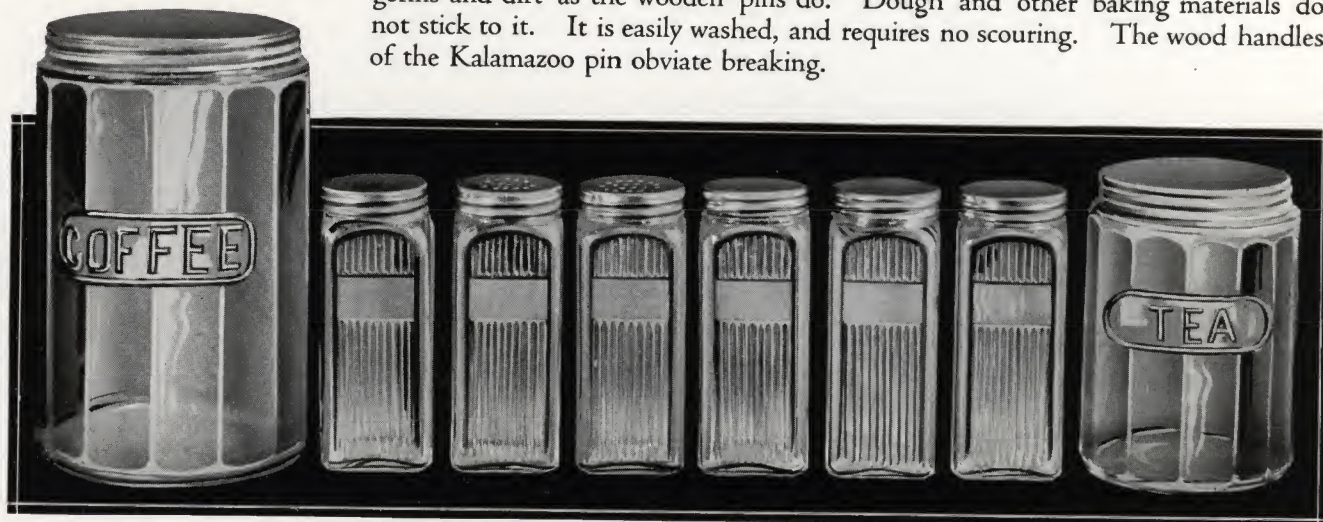

As regular equipment, coming to you with the kabinet in addition to the sugar container, is a fine set of heavy crystal glass containers for coffee, pepper, ginger, cinnamon, cloves, etc.

There are eight pieces in this convenient and beautiful set of glassware. These pieces are all placed in a position easy to reach—so that any material you want for your mixture is right at hand. You don't have to rise to reach it.

These jars are all of clear glass so that you can see the contents. The label spaces are left blank so you may label each container for whatever you use it for. They can always be washed as clean as the kabinet. Being dust-tight, air-tight and moisture-proof, they preserve the strength of the contents right down to the bottom.

White Glass Rolling Pin

The white glass rolling pin, with detachable wood handles, is another of the high grade articles that come with the kabinet. Particular housewives now discard the old-fashioned, insanitary rolling pin in favor of the white glass. Its solid, shiny white surface has no pores or fibre to catch and to hold germs and dirt as the wooden pins do. Dough and other baking materials do not stick to it. It is easily washed, and requires no scouring. The wood handles of the Kalamazoo pin obviate breaking.

Full Set of Crystal Containers

Extra quality heavy crystal makes these large containers clear, beautiful and serviceable. Space is provided on each container which you can label with whatever you use it for. Two containers have shaker tops for salt and pepper.

Lightens the Labor

Kalamazoo Sliding Table Top

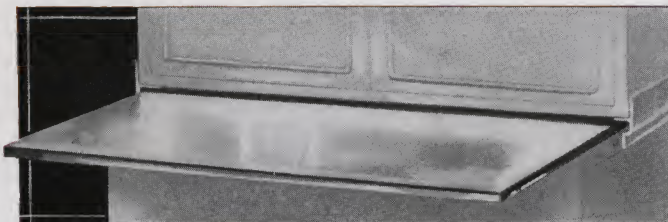

THIS wide and roomy table top is one of the finest, as well as one of the most convenient features in the Kalamazoo Kitchen Kabinet. It is covered with nickeloid, finished with a mirror polish. Nothing can be cleaner or more sanitary. As shown in the illustration of the closed kabinet, it is pushed in, making a wide shelf in front of the kabinet.

Note particularly that the construction uniting upper and lower sections is such as to permit the sliding table top to be the full width of the kabinet. This gives the utmost room. It is not narrowed by tracks at the sides, which catch dirt and lessen the width, as in some cabinets.

When you wish, you can draw it out—it slides with perfect ease—and thus you have the use of the entire top for work, 26x39 inches. Our table top drawout (patented—nobody else has it) locks the table top when it is drawn out so that it is safe and firm under any weight. Yet it is easily lifted out for cleaning or pushed back when entire surface is not needed. Being in the middle of the kabinet, it is within reach of everything you need.

You sit at this table with your kitchen tools and materials all at hand and with more room for your work than you need use.

Nothing that you might spill on this table will injure it. Its surface remains level after years of daily service. The wood cabinet makers admit that the sliding table is one of their greatest difficulties, owing to the warping of the wood under the metal. No such trouble bothers the users of the Kalamazoo.

Kalamazoo Sliding Table Top

Note how far the table can be drawn out, making roomy, level and solid working surface. Our patent drawout locks it securely.

this drawer or push it in without effort. Its sliding top makes a cover and thoroughly protects the contents from dust. It prevents evaporation so your cake or bread stays fresh. How different from the cupboard or pantry box in which the cake or bread soon becomes dry and stale! This drawer, as well as the others above, can be removed from the kabinet and cleaned.

NO OTHER CABINET SO SATISFACTORY

Kalamazoo Stove Company

Gentlemen:—I take this occasion to say that I have seen almost all the kitchen cabinets that are now on the market, but I never saw one that I liked as well as I do yours. This is also the opinion of Mrs. Robbins.

It combines all the good features of other cabinets and has some exclusive features which are not found in the others. We are very, very well pleased.

FRED A. ROBBINS
Chicago

ARRIVES IN PERFECT CONDITION

Robert Hunter, Commercial Agent of the Merchants and Miners Transportation Company at Pittsburg, Pa., writes as follows:

Kalamazoo Stove Company

Gentlemen:—I take pleasure in advising that my Kalamazoo Kabinet arrived on Friday last. It has been duly installed, and is in perfect condition.

ROBERT HUNTER

EVERY HOUSEKEEPER SHOULD HAVE IT

Kalamazoo Stove Company

Gentlemen:—We have received our Kalamazoo Kitchen Kabinet and are well pleased with it. It is a very convenient piece of furniture for every housekeeper.

L. B. YALE
Chautauqua, N. Y.

SANITARY AND PEST PROOF

Kalamazoo Stove Company

Dear Sirs:—The Kitchen Kabinet is all right. It is sanitary, rat and mouse proof.

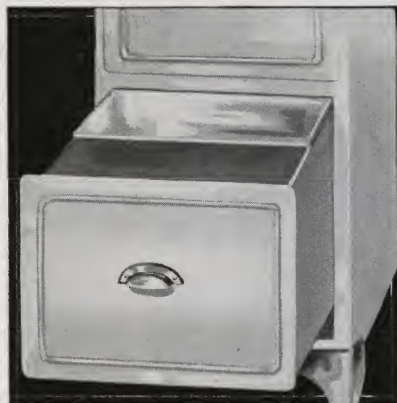

MRS. GEORGE M. CARTER
Cloverdale, Ind.

ALL THAT IS CLAIMED FOR IT—AND MORE

Kalamazoo Stove Company

Dear Sirs:—My Kalamazoo Kitchen Kabinet arrived safely. The article is certainly all you claim for it—and more.

C. L. LEONARD
Raleigh, N. Dak.

Extra Large Bread and Cake Box

23 inches long; 12 inches wide; 10 1/4 inches deep.

Keeps bread and cake fresh; protects contents from dust. Comes out and goes in on smooth slides as if by magic.

Kalamazoo Bread and Cake Box

A special feature is the Kalamazoo Bread and Cake Box. This box is the large bottom drawer on the right side. We have gone to the trouble and expense of giving this drawer an extra lining of silvered tin to prevent any molding of bread, cake or other contents—a special precaution not found in ordinary cabinets. You can draw out

Germ-Proof, Dust-Proof Flour Bin

ESPECIAL attention is called to the Kalamazoo convenient, germ-proof, dust-proof flour bin, equipped with a fine mesh, easy-turning sifter in the bottom spout. The flour goes in at the top and is rapidly sifted out at the bottom. You can easily place your pan, bowl or any utensil, high or low, under the spout and draw out just the amount of flour you want. You do not spill the flour. There is no waste.

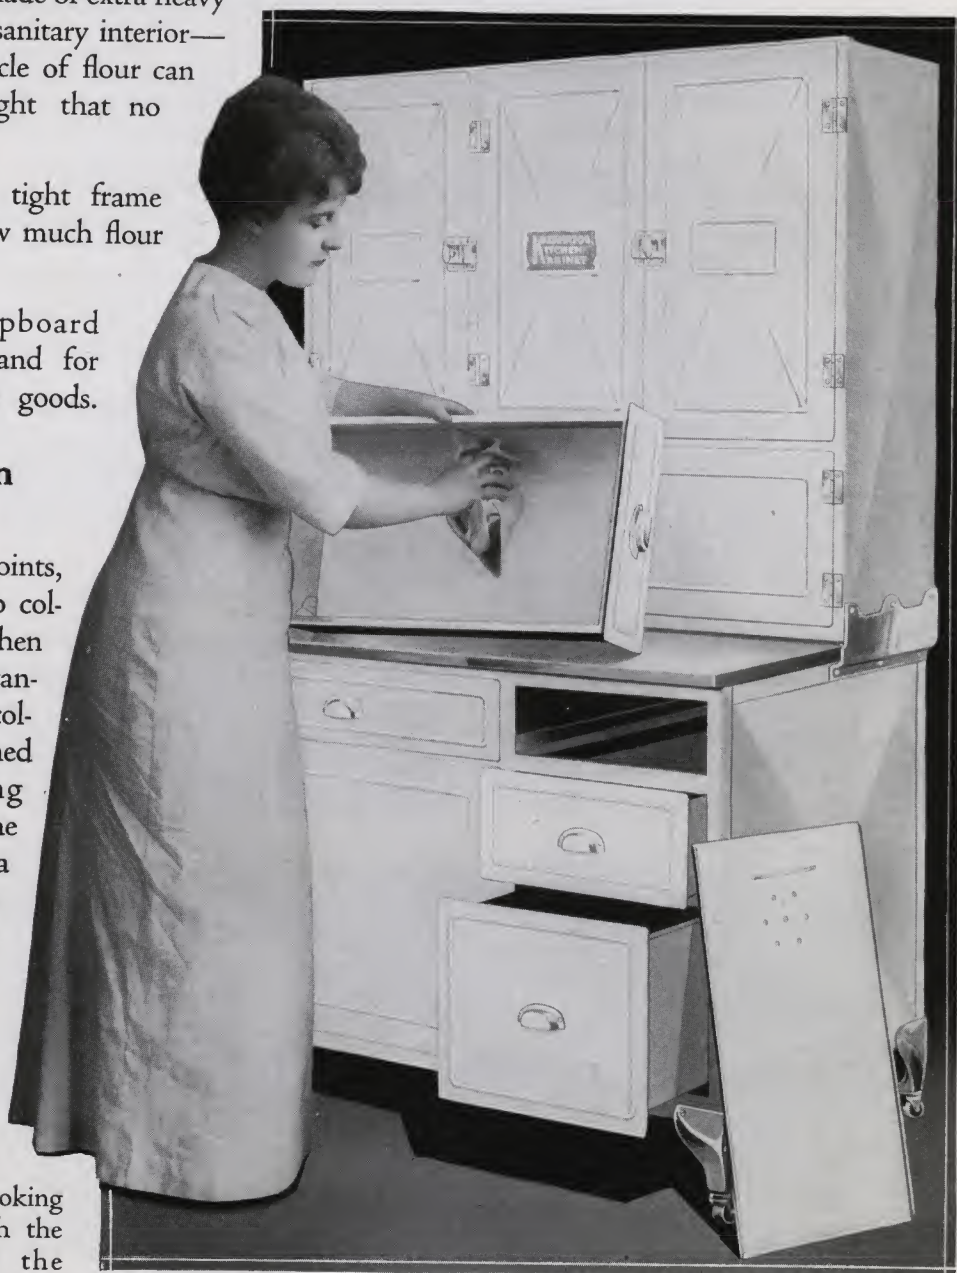

It is a decidedly economical feature. A cup fits over the spout, so that the flour comes out only as needed. The bin, being made of extra heavy silvered tin, has a perfectly sanitary interior—so smooth that not a particle of flour can lodge on its sides—so tight that no dust can possibly work in.

A clear glass panel in a tight frame always shows you just how much flour the bin contains.

The spacious upper cupboard affords room for dishes and for cereals and other package goods.

Every Corner Open to Air and Light

Having practically no joints, there is no place for dirt to collect in the Kalamazoo Kitchen Cabinet. The corners cannot even spring apart and collect dirt as even the best joined wood may do. Washing and wiping the inside of the Kalamazoo is like wiping a porcelain bowl. And when you wish to give it a thorough airing you can open it up, remove the drawers and table top and let the air and light into every part of it. It is always a clean, sweet, sanitary workshop—a fit place for your cooking materials and utensils. With the least care you can keep the Kalamazoo far more wholesome than the most expensive cupboard ever made.

As Easy to Wash as a Dinner Plate

No trouble to keep Kalamazoo clean. Its smooth, glistening white enamel surface is just as easy to wash as porcelain.

White-Enameled Beauty!

Roomy Drawers for Knives, Forks and Tea Towels

There is a proper drawer for each set of articles, giving you all the room you will ever need for the things in daily use.

Our Kalamazoo drawer catch (patented—nobody else has it) is a decided improvement. You can pull out any drawer without danger of jerking it away or completely out. A catch is at the back of the drawer. By simply lifting it from its groove you can take the drawer out of the kabinet for cleaning or airing.

The removable steel enamel shelves make it possible to take these out for cleaning. Shelf paper is unnecessary.

Cupboards for Pots, Pans and Kettles

The lower cupboard is a place for your larger cooking utensils—your pots, pans, kettles, etc. The adjustable shelf being all steel, one piece, never falls down, never sags, warps or comes loose. Here is a splendid advantage over the wooden cabinet. No matter how much weight you put on your Kalamazoo Kabinet cupboard shelves, they will always remain firm.

The adjustable shelf is a special Kalamazoo feature. The shelf is not the full depth of the kabinet, and slides in and out. This makes it possible to set high vessels on the bottom of the cupboard either in front or in rear of the shelf. There is room in the cupboard for the tallest vessels or packages.

Pie pans, lids and covers have a most convenient place—the metal basket or rack on the cupboard door. This is just as firm as the shelves. Notice the form of the rack preventing any possibility of the articles falling out.

This feature is a decided improvement over the racks in ordinary cabinets. In some just a rack and bar are provided, which do not prevent the pans and covers from sliding through and falling on the floor or into the kabinet.

No matter how carelessly you place the articles in the Kalamazoo's specially designed holder, they will stay there. This is one of the minor points that illustrate the completeness in every detail of the kabinet.

Back of the basket on the cupboard door you see the metal pocket for the moulding board. This is much more convenient than a hidden recess under the table top for which you have to feel, as in some cabinets.

Legs High Enough to Permit Easy Floor Cleaning

The Kalamazoo stands on strong legs high enough to permit you to sweep or mop underneath without the least trouble. Large steel ball bearing casters which come with the kabinet as part of the regular equipment make it easy to move the kabinet about. Any woman can push the kabinet from one side of the kitchen to the other without help.

Lighter Than Old-Fashioned Wooden Cabinets

The Kalamazoo is much lighter than the old-fashioned wooden cabinets.

In an effort to overcome the shrinking, warping and cracking of wood under the moisture and heat of the kitchen, the makers of wooden cabinets are forced to build up their panels, gluing one layer of wood upon another. This makes the wooden cabinet very heavy. Any owner of a wooden cabinet will tell you that it takes one or two men's strength to move the cabinet around. It is as difficult as piano moving. You save yourself all this trouble by having the all-metal Kalamazoo. Its steel frame and walls welded into our one-piece construction have strength and rigidity that can not be approached in wood. Because steel walls combine this lasting strength, solidity and rigidity with lightness, the Kalamazoo does not need and does not have anywhere near the weight of "built-up" wooden cabinets.

Office men now generally use light, indestructible modern steel filing cabinets in preference to the out-of-date wooden ones. There is the same difference between the Kalamazoo and the wooden kitchen cabinets.

One of the joys of the Kalamazoo for which you will always be thankful is the ease of handling it in house cleaning or moving.

Special Improvements

(Patented)

No One Else Has Them

Among the many improvements found in the Kalamazoo Kitchen Kabinet, you will notice particularly those which are covered by our patents such as our drawer catch and our table top drawout feature previously described. You will not find these on any other kabinet. They add wonderfully to the serviceability of the kabinet, and exemplify the decided advances we have made in every feature.

An Ideal Gift

For Birthday, Wedding, Wedding Anniversary or the Holidays

A gift of the beautiful all-metal, white-enameled Kalamazoo Kitchen Kabinet makes mother, sister, daughter or the whole family happy.

It is one of the most acceptable gifts ever made for birthday, wedding, wedding anniversary or the holidays—you are certain it will be a source of usefulness and pleasure for a lifetime.

A gift of *quality* that impresses both the one receiving it and all her friends.

Thousands of kabinets are bought for gifts every year and for every occasion. Make your next present a Kalamazoo.

Solves the Help Problem

Bread, Pastry and Confectionery Board

On the inside of the lower cupboard door you will notice the bread, pastry and confectionery board—a part of the regular equipment. The metal plate used in the manufacture of this board is a special composition and the board is finished in pure palm oil. The base is made of three-ply veneer, the grain of the wood crossed and preserved against climatic changes, thus preventing it from breaking or splitting, against which it is fully warranted.

The improved non-absorbent moulding board saves labor and materials. Dough does not easily adhere to it. There is no waste of flour. The kneading and rolling surface being non-absorbent, it is always clean and ready for use in preparing pastry, confectionery and other foods. In kneading, no more flour is required than is necessary to temper the dough. This is important in good baking. Lard, butter and other materials can be mixed without being absorbed. This board possesses all the cooling effects of marble, the advantage of which is well known in pastry cooking.

Good strong rubber "feet" on this board positively prevent it from slipping or sliding when you are kneading on it. This is a convenience that every housewife will appreciate.

When you are through using this board simply clean it with a damp cloth and wipe dry. No scouring or scraping is required.

When the moulding board is not in use you keep it in the convenient metal pocket on the cupboard door of the lower section—it fits easily into this specially designed pocket, is protected from dust, and is within easy reach while you are sitting at the kabinet.

Water Cups Keep Ants and Other Insects Away

Thick glass water cups, with islands to keep the casters dry and free from rust, are supplied at a slight cost of 50c per set. (See lower illustration.)

Kabinet Kept Free from All Kinds of Pests

Standing kabinet in the water cups, access of ants and vermin to kabinet is made impossible. (See cut above.)

The Kalamazoo Market Memo

Hung on the door within convenient reach is the Kalamazoo Market Memorandum. It is a tablet of special design made for this purpose with perforated sheets. You can put down your market list, or other items of kitchen business, every day, and after they have been attended to, detach the sheet. It is one of the little things that make the Kalamazoo the most serviceable kitchen kabinet ever furnished.

Strong, Roomy Metal Baskets for Cooking Utensils

The kabinet is furnished in both upper and lower sections with roomy metal mesh baskets for pans or other vessels and cooking utensils. These baskets have a beautiful silver finish and are so firmly anchored that you need never fear they will come loose. Especial attention is called to the unusual roominess of these baskets. Like everything else about the Kalamazoc, they are built for satisfactory service.

Select Your Kabinet

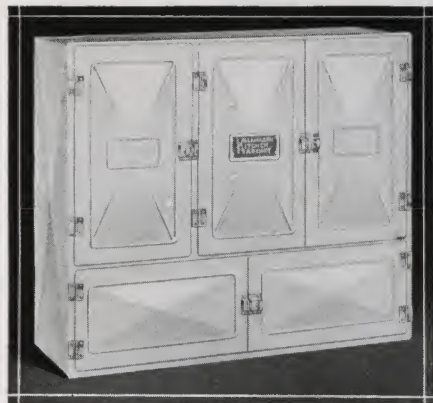

A Kalamazoo Kitchen Kabinet for Every Woman—for Every Home

| Cat. No. | Height | Width | Length |
|----------|--------|--------|---------|
| Y-50 | 66 In. | 26 In. | 40½ In. |

This is the Kalamazoo Kabinet without lower doors on upper section. Larger illustration is shown on page 9. It meets the demand of many of our customers who prefer not to have doors in front of them or swinging outward over the table top. Not having these doors the kabinet is priced a little lower.

| Cat. No. | Height | Width | Length |
|----------|--------|--------|---------|
| Y-30 | 36 In. | 12 In. | 40½ In. |

Kalamazoo Wall Kabinet described on page 13

We make the all-metal, white-enameled, nickel-trimmed Kalamazoo Kitchen Kabinet in a style to meet the preference of every woman and the price she wishes to pay.

On this page are grouped our five models. The material, construction and white enamel finish, inside and out, of each of these models are exactly the same—and that means the highest quality. The equipment, so far as furnished, is the same as that which goes into the kabinet complete.

| Cat. No. | Height | Width | Length |
|----------|--------|--------|---------|
| Y-60 | 66 In. | 26 In. | 40½ In. |

Kalamazoo Kabinet on Table Base illustrated on page 15 and described on page 14. It answers all purposes where the closed cupboard below can be dispensed with. Has the sliding table top and eight crystal containers. No matter which style you select, it's a Kalamazoo—with all the Kalamazoo quality. Furnished with flour bin at slightly higher price when so ordered.

FOR PRICES see list inside Back Cover.

You Deserve This Help

Of All the Cabinets in the World

THE Kalamazoo Kitchen Kabinet is the one you would choose if they were set before you.

You would see higher priced cabinets—much higher priced. But you would not find any with more useful equipment—and regardless of price you would not find any so convenient, so beautiful or so durable. The Kalamazoo is the heirloom kabinet—the one you will use a lifetime—to be handed down to your children.

You would see cheaper cabinets. But their cheap construction, ugly, unfinished, box-like appearance and cheap, scant equipment would never satisfy you. Moreover, the cheap cabinet is an extravagance, because it would last only a few years, and you will buy a Kalamazoo eventually, so the cheap cabinet would be a dead loss.

The Kalamazoo Kitchen Kabinet is the materialization of the dreams of thousands of women of what a cabinet should be.

But, unlike dreams, it is not beyond the reach of your purse.

Because of our matchless manufacturing facilities and our direct-from-factory dealing, this finest production of all, costs you only a little more than even a wooden cabinet. It costs you \$15.00 to \$20.00 less than even the next best enameled steel cabinets which are on sale in the stores.

Such an article at such a price can only be offered on a direct-from-the-factory basis. Then we go a step further in making it easy to get. We offer you easy payment terms. Take eight months if you wish.

We Present You With 30 Days of Kabinet Help

It is difficult to demonstrate to you in print the extra value of the Kalamazoo. You must see it and examine it, really use it, to fully appreciate its greater beauty, convenience, healthfulness and lifelong durability.

Our pictures here are true reproductions. But only through seeing it can you admire it as it deserves. Only through use of it can you measure its great help to you and its superiority over any other you could get, regardless of price.

If we sold it through dealers you could see it first—but you would have to pay the extra \$20 or so. Instead we say—let us send you one to try for approval. Let the Kalamazoo Kabinet itself prove its greater helpfulness, its greater value, in your own kitchen. Let it help you get nearly a hundred meals, let it delight your eye, let it save your steps for 30 days before you decide whether you'll keep it or not.

That's really better than merely seeing it at the store.

If for any reason you think you would rather have your money than the kabinet after this test, ship it back to our factory at our expense and every cent you have paid us, all the cash price or the first installment, according to how you order, will be refunded at once.

This promise is backed by a legal guaranty and a \$100,000 bank bond. Better still, we have more than 300,000 customers to refer you to. Each has bought one or more stoves, furnaces or kabinets on this trial basis. Suppose you let us send you one just for a month's test anyway?

How Steps Are Saved

A 10-Mile Walk

"WELL, John, I did ten miles today."

"That's fine, Mary; where did you go? Round the house?"

"Yes, that's exactly where I did go."

"Now, Mary, the doctor said you should get outdoors more."

"Do you think ten miles a day would do me good?"

"Sure!"

"Outdoors or inside?"

"Outdoors, of course. Inside walking doesn't give you fresh air and the right kind of exercise."

"Well, here are the figures, John. I've walked exactly ten and three-quarters miles in this house; in the kitchen, in the dining room, in the children's room, in the cellar, in the attic, in the bedrooms. I've figured it out and kept count—ten and three-quarters miles and it's taken me practically all day and the supper dishes aren't done yet or the children put to bed."

"Nonsense, Mary—ten miles! How did you get your figures?"

"I borrowed Tom's pedometer. That's a little watch, you know, that accurately measures the distance you walk. I put it on when I got up—and it now registers ten and three-quarters miles."

"Well, I'll be switched! I think it's time you got some help, Mary."

"No maid for me. That's \$5 a week for the cheapest I can get, and an extra mouth to feed, and an extra room. We'd have to get more blankets and have extra laundry—she'd waste more than I—and all our neighbors have had the worst sort of luck keeping maids out here so far from town. No, I'll not go to that expense, John, but I'll tell you what you can do—you can get me a Kalamazoo Kitchen Kabinet. That will save a number of those miles, every day, I'm sure."

"Well, that's a good argument, Mary, but those fine Kalamazoo Kabinets cost a good deal, I suppose, and I don't feel just like handing out a big sum at this time."

"You're wrong, John; I can have it in here for nine or ten dollars down and a little each month. We can

take eight months to pay the balance, if we want to."

"All right, Mary. That's a fine idea. If their kabinet is as good as the range and the furnace, it's a dandy."

"Yes, it certainly is of the regular Kalamazoo quality—and I haven't seen another cabinet anywhere that compares with it, even at much higher prices. And now I'll show you my 'K. K. K. Bank.' That stands for my Kalamazoo Kitchen Kabinet Fund. For some time back I've been pinching down the household expenses a little, and now and then, as I could spare it, I'd put a dime or a quarter in this box. I meant to save enough for the first payment before telling you. I haven't quite enough yet—but do you think you can spare the difference tonight? Because if you can, I want to send the order at once."

"Say, Mary, you make me feel ashamed of myself. You just keep that money you have saved and buy something fancy. I'll pay that kabinet money. Where's the order blank?"

"In the desk, right-hand upper drawer. You get it, while I look at the oven."

Kabinets for Every Purpose

Our Heavily Braced Construction—No Warping, Buckling or Sagging

THIS picture of the under side of our patented sliding table top well illustrates the heavily braced construction used in all our kabinets, kabinet tables and kitchen tables. The frame and braces of angle steel electrically welded make this a one-piece support so rigid that no weight you could ever put on it would spring it. You can count four strong steel braces extending the full width of the frame and fused by electricity *into* the frame. These support the top at every point and absolutely prevent the warping, buckling and sagging so common in ordinary metal kabinets or tables. Your Kalamazoo kabinet or kitchen table top is always level—free from bumps and hollows. With the kabinet and kitchen table you have an ideal and inviting workbench for your dough and cooking mixtures. The kabinet table has a level, solid top that keeps its quality after years of hard use. The steel frame and braces supporting the handsome nickeloid top are heavily enameled on the under side.

Kalamazoo Kabinet Tables

As leaders in the great movement toward sanitary kitchens, we take much pride in presenting to you the new Kalamazoo Kabinet Tables, shown in colors on the opposite page.

The all-steel, white-enameled table kabinets with nickeloid tops, while the ideal thing for kitchen service, really have a much wider range of usefulness. Physicians and dentists are adopting them for office and hospital use, because of their strictly sanitary advantages, as well as their great convenience. Housekeepers are using them in bath rooms, the nursery and other rooms for linen chests, etc.

Kitchen service alone, however, demands the cleanliness, convenience, comfort and health-insurance of

the Kalamazoo Kabinet Table. Hot coffee or fruit stains can be wiped off as easily as water, merely by passing a cloth over them. There are no cracks to catch dirt, no pores to absorb grease and germs. A real convenience and ornament to the kitchen. Wooden tables or coverings of oilcloth are troublesome, insanitary and unsightly. They have no place in the modern home. The Kalamazoo All-Metal, White-Enameled Tables are made of the best quality metal, heavily enameled in pure white—two coats—applied by patent process, baked on under high temperature. Finished with a highly polished nickeloid top.

Let us send you your choice on 30 days' free trial.

Kalamazoo Kabinet Tables

Catalog No. Y-70. Top measures 40 inches long, 27 inches wide; stands 31 inches high

THE ideal table for use in the kitchen, even though you have a complete Kalamazoo Kabinet. Equally valuable for general home use, in bathroom, for linen chest, etc.

Just the thing for the office of Physician or Dentist.

Sanitary, convenient, handsome in appearance and everlasting.

You Can Pay More

Kalamazoo Kitchen Tables

Sanitary—Easy to Clean —Last Forever

The Kalamazoo Kitchen Tables are built in the same splendid, substantial way as are the kabinets themselves. Made entirely of metal, heavily enameled in pure white, they are absolutely sanitary in every respect. Grease cannot penetrate the polished nickeloid top of a Kalamazoo Table. For this reason the Kalamazoo Tables are far more sanitary than wood, the pores of which absorb grease and dirt.

Hot dishes do not mar the top of a Kalamazoo Table, and fruit juice does not stain it. Think what a comfort such a table would be in preserving time. Fruit juice as easily wiped up as water. No ugly marks from hot basins and pans as on oilcloth or wood. A Kalamazoo Table Top does not cut nor crack as does oilcloth.

| Catalog No. | Width | Length | Height |

| Y-90 | 27 Inches | 36 Inches | 31 Inches |

FOR PRICES see list inside Back Cover

| Catalog No. | Width | Length | Height |
|-------------|-----------|-----------|-----------|
| Y-100 | 27 Inches | 36 Inches | 31 Inches |

FOR PRICES see list inside Back Cover

Because Kalamazoo Tables are built entirely of metal they cannot wear out. The legs and frame are of angle steel; electric welding makes it one piece, the same as in the kabinet complete. These tables stand squarely on all-fours and do not slant, wobble or warp. They last indefinitely, always look well and they are always convenient. Each style gives satisfactory service. If you simply want drawer space for kitchen silver and tea towels, catalog numbers Y-90 and Y-100 are excellent. Number Y-90 also gives generous shelf-space.

For the woman who wants plenty of drawer space in her kitchen table, catalog numbers Y-70 and Y-80 shown on page 25 will be found very convenient. These tables, while taking up no more floor space than an ordinary table, furnish ample storage space for tins, towels, kitchen silver, etc. These tables may be used to good advantage outside the kitchen. For nursery, bath or maid's room they are excellent.

Kalamazoo Enameled All-Metal Tables are sold on the same liberal plan as are the kabinets. Shipped "direct to you," you pay only the wholesale factory price. 30 days' free trial, and we pay the freight.

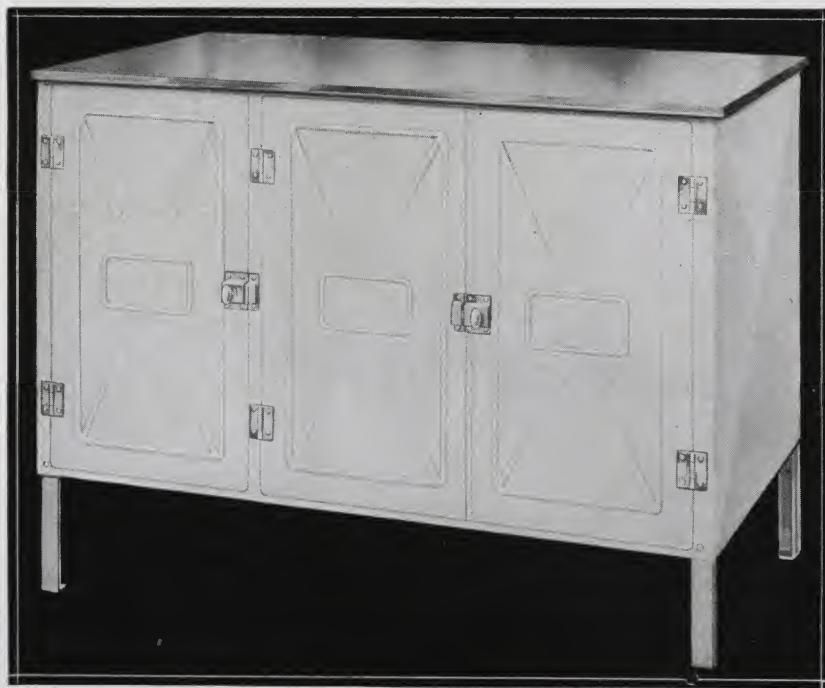

You Can Not Buy Better

Kalamazoo Linen Table Cabinet

HERE is another form—the Kalamazoo Linen Table Cabinet with the cupboard feature most conveniently worked out. It is equipped with a spacious shelf inside, is adaptable to both table and kabinet use, and is most desirable wherever cleanliness and sanitation are of prime importance. It is as serviceable in laboratories, physicians' offices, dentists' offices and sanitariums, as in the home. It is a special delight to particular housewives.

| Catalog No. | Height | Width | Length | Size of Working Surface |
|-------------|-----------|-----------|-----------|-------------------------|
| Y-85 | 31 Inches | 27 Inches | 40 Inches | 27x40 Inches |

FOR PRICES see list inside Back Cover

In Nurseries, Bathrooms, Linen Closets, Maids' Rooms, Etc.

The Kalamazoo All-Metal Three-Door Linen Table Cabinet, enameled inside and out, is ideal for use in the nursery. Clean and cool looking, it adds attractiveness to the room. By reason of its heat and moisture-proof top it offers a splendid place for baby's own ironing board, weighing scales and soap dish and the host of other necessary accessories which are liable to ruin wood tables.

Used as linen cupboard in bathroom, it serves ad-

mirably, for moisture cannot harm its construction or finish. In linen closets it protects table linen and bedding from being gnawed by mice or streaked with dust.

To serve as cupboards or washstands in country homes or maids' rooms, the Kalamazoo Linen Table Cabinet is invaluable. Absolutely sanitary in every respect, very easily cleaned, not harmed by moisture, the linen table kabinet is suitable for any number of practical purposes.

Kalamazoo

All-Metal Enameled
Goods All Made in
Our Great Plant

OPPORTUNITIES
for the best work are not
possessed by every manufacturer.
But we are prepared to make the best

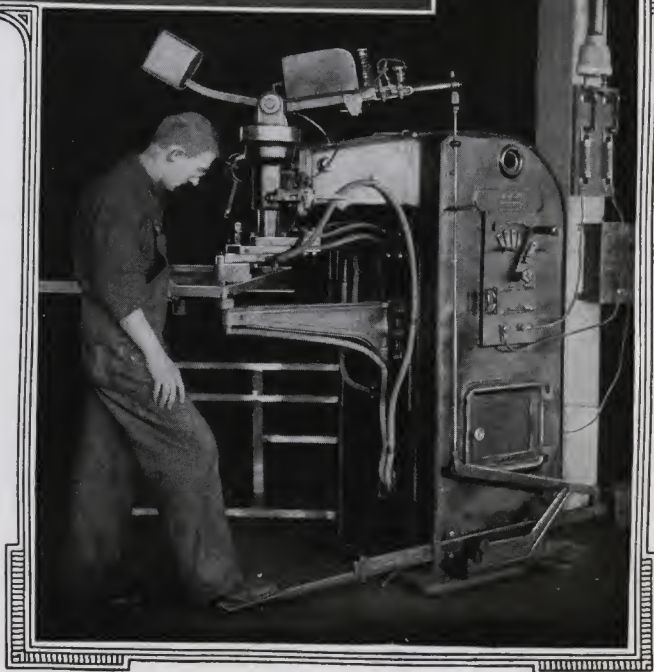

kabinets,
stoves, ranges
and furnaces
in the world—
and we do it.
The size and
perfect equip-
ment of our fac-
tory gives us the
opportunity to
put more real
value into our
products than
others can. It
is an immense
plant. It's an
education to go
through it.

YOU'D be interested in
the wonderful system that
prevails from the time the raw
material is unloaded until the
finished kabinet, furnace, stove
or range, covered and crated,
is loaded into a freight car.

All the special machinery used
in manufacturing Kalamazoo
Kabinets and Tables is the
most modern, and well illus-
trates the wonderful science
which marks the latest produc-
tion of this sanitary furniture
for home and office. The
great steel stamping press, the
huge electric spot welder, the
spraying machines which shower
the steel with enamel, the won-
derful enameling oven where the enamel is baked
on the steel—all are interesting sights.

Here are a few facts about our factory:

The main building is 764x120 feet; it includes the
main foundry, 436x120 feet, new foundry annex,
200x60 feet, and the factory proper, 328x120 feet,
two stories in height. The warehouse, 225x300
feet, with 26-foot ceiling, gives a storage capacity
for 40,000 stoves and kabinets. The office build-
ing is two stories, 85x25 feet, a one-story annex,
20x40 feet, and a fire-proof correspondence vault,
two stories high, 22x32 feet. The power house,
140x40 feet; the cleaning room, pattern shops,
galvanizing plant, the flask and other buildings for
storing raw material, etc. And then there's our
furnace building, 200 feet long by 100 feet wide,
giving nearly six acres of floor space.

Use Our Efficiency Service

Kalamazoo All-Metal Built-In Conveniences for Modern Homes

IF YOU are planning a new house or remodeling an old one take advantage of our free service to build kitchen efficiency into your home. Write us asking any questions. Send us a rough draft of your floor plan. We will gladly make suggestions without any cost to you or obligation on your part. The Kalamazoo Kitchen Kabinet, Wall Kabinet, Section Kabinet, Kabinet Table or Linen Table Kabinet, are readily adaptable to built-in construction, which you can easily incorporate with your plans. They can be used in any home of every size and price, from cottages to mansions, and come all ready to install. Then their enamel finish harmonizes beautifully with any wood finishes. With the Kalamazoo built-in features you will have all ready for use and forever *a part of your kitchen* a big, roomy cupboard, a spacious work table to take the place of the ordinary kitchen table—and all the new, convenient, work-saving features that go into our kabinets and tables.

How successfully the Kalamazoo Kitchen Kabinet fits its place when our measurements are figured is told in Mr. Stevens' letter at the bottom of this page.

You will find, too, that the greater convenience, cleanliness and attractiveness of the Kalamazoo Metal Kabinet, Cupboard or Table costs no more when provided for in your plans than to build in wooden cupboards, shelves or drawers.

You also have durability in these Kalamazoo conveniences as long as the house stands. The Kalamazoo Kabinets, Kabinet Tables and Kitchen Tables have the same solid, one-piece, angle-steel frames, the same tops, bottoms, sides, shelves, etc., and the same spot and butt welding as the kabinet complete. They can not warp, sag, buckle, pull apart or lose their shape or usefulness in the hardest service you can ever put them to. And they are all double enameled, inside and out, by patent process, and baked on. They are finished to look their elegance after years of use.

The Kalamazoo Stove Company has long studied every problem of the kitchen, from stove and range to the smallest of labor-saving devices.

All our knowledge and experience is freely placed at your disposal. In this book you will find reference to each of the special catalogs on our several lines, not only for the kitchen, but for heating your house or any building. Any one of the catalogs will be sent promptly on request. We invite your correspondence.

Admired by All and Fits Its Place

81 Chapel St., Albany, N. Y.

Oct. 25, 1914

Kalamazoo Stove Company

Dear Sirs:—

Your Kitchen Kabinet shipped on the 5th of October arrived in Albany on the 12th and shortly thereafter was delivered to my home. The kabinet received in perfect condition. The kabinet was entirely satisfactory to Mrs. Stevens and has been admired by all who have seen it. The measurements you sent me before I purchased the kabinet proved so accurate that the kabinet exactly fits the jog in the kitchen to take it.

OGDEN STEVENS

"Direct to You" Means

How to Order a Kalamazoo Cabinet, Cabinet Table or Kitchen Table

To find the price select the cabinets or tables you want from the table of measurements beneath the picture, then compare the order number with the order number in the price list which is attached to the inside of the back cover of this catalog.

In making out the order please observe the following suggestions:

Use the order blank on page "C."

In column "A" write *how many* cabinets or tables you want to buy or take on trial.

In column "B" write the *catalog number*, which you will find beneath the picture of the kabinet or table.

In column "C" write the *page of the catalog* on which is shown the picture of the kabinet or table.

In column "D" write carefully the name of the kabinet or table which you will find with the picture.

In column "E" give the exact price as quoted in the price list on the inside of back cover. Be careful to see that the order number under the picture and the order number in the price list correspond.

Under head of "terms of purchase" fill in the blank spaces opposite the plan you select for buying.

Write your name carefully and plainly and do not fail to give the name of the railroad on which your shipping point is located, where you want the kabinet or table shipped, also your postoffice address.

PLAN No. 1. You may send the order and money direct to us. It will be considered a deposit during the 30 days' preliminary trial. This plan saves time and bother, and you are perfectly safe in sending your money direct to us because we are entirely responsible in every way, as you will find by reading this catalog. If, after trying the kabinet or table for 30 days, you do not find it exactly as represented by us, all you have to do is to notify us, and upon receiving our shipping directions recrate the kabinet or table and ship it back. As soon as we receive railroad shipping receipt showing its return, the full purchase price will be sent to you.

PLAN No. 2. You may send the order direct to us. Fill out the bank deposit letter "A" on page "B" and send the money and bank deposit letter "A" to the First National Bank of Kalamazoo, Mich. They will hold the money for 30 days, subject to your order alone. Should you return the kabinet or table within 30 days from the time you receive it and send the railroad shipping receipt to the bank, they will immediately return to you all the money that you have deposited with them, and we will pay railroad freight both ways.

PLAN No. 3. You may deposit the money in any bank you may select. Have the banker fill out the certificate of deposit "B" on page "B" and *sign it officially*; send the order and certificate of deposit "B" to us, and we will immediately ship the kabinet or table direct to you. The certificate of deposit fully explains the conditions under which the deposit is made. If you do not find the kabinet or table exactly as represented after 30 days' trial return it to us, send the railroad shipping receipt to us, and we will immediately instruct the banker with whom the money is deposited to return to you the full amount of

the deposit. We will pay the freight on the returned kabinet or table. As all the prices quoted in the price list on the inside of the back cover of this catalog are net prices, when this plan is used it will be necessary for you to deposit with the purchase price the banker's charge for sending the money to us in case you keep the kabinet or table. This charge should in no case exceed the sum of 25 cents, and must be deposited in addition to the price of the kabinet or table.

Buying under any of these plans, both yourself and this company are thoroughly protected, and you can rest assured you will get honorable treatment in every way. Under Plan No. 1 the \$100,000 bank bond we have with the First National Bank insures the return of your money in case you return the kabinet or table. Under Plans Nos. 2 and 3 your money is in the hands of a third party and you are sure to get it back if you return the goods as specified above.

PART-PAYMENT TRIAL PLAN. This is where you deposit only a part of the price (usually about $\frac{1}{4}$) while you test the kabinet or table for 30 days. You either send the part payment to Kalamazoo in accordance with Plans Nos. 1 or 2 or you deposit it with your home bank as suggested in Plan No. 3. (Use the blanks on page "B.")

While our part-payment trial plan gives you your kabinet or table at our cash price, it will of course be necessary for you to give us satisfactory credit references for the balance which you will pay in 30 days. To do this, simply send us the names of two or three of the business houses with whom you do business and also the names of one or two of your neighbors, if agreeable.

FACTORY CREDIT PLAN. You pay part down with the order and the balance in monthly payments. *If you desire to use this plan be sure to supply the references provided for in the blank lines provided in page "C."* This is very important for we could not grant credit privileges without this blank properly filled out with your order. Upon receipt of this at our office, and we find your credit references satisfactory, we will send the proper time-payment order blank, showing the amount to be paid down and the exact amount to be paid each month.

HOW TO SEND MONEY. Send money by postoffice money order, express money order or bank draft. *Never send cash* in a letter unless you register the letter at the postoffice or send it by express. *No personal checks will be accepted in any case unless certified to by the bank on which the check is drawn.* In such cases 25 cents must be added to and sent with the purchase price to cover the cost of collection. Most of our customers send their money direct to us to save time and bother, and they are perfectly safe in so doing under our \$100,000 bank bond and backed by our \$315,000 capital and the high standing and financial responsibility of the directors of this company. No matter which plan you may select, you can rest assured that you will get honorable treatment in every way.

PRICES quoted in this catalog include the freight charges paid to the railroad shipping point for the city or town shown in your request for the catalog, and are not to govern or to be used for any other city, town or state. If you move or desire quotations to any other shipping point, ask for prices to that railroad station. If you change your postoffice address after receiving this catalog, kindly notify us of such change and ask for prices to your new address. *We do not pay hauling or drayage charges at your end of the line.*

Big Saving to You

The Kalamazoo Stove and Range Catalog Is the Most Complete Published

Write for a copy if you are interested

Save
\$5 to \$40

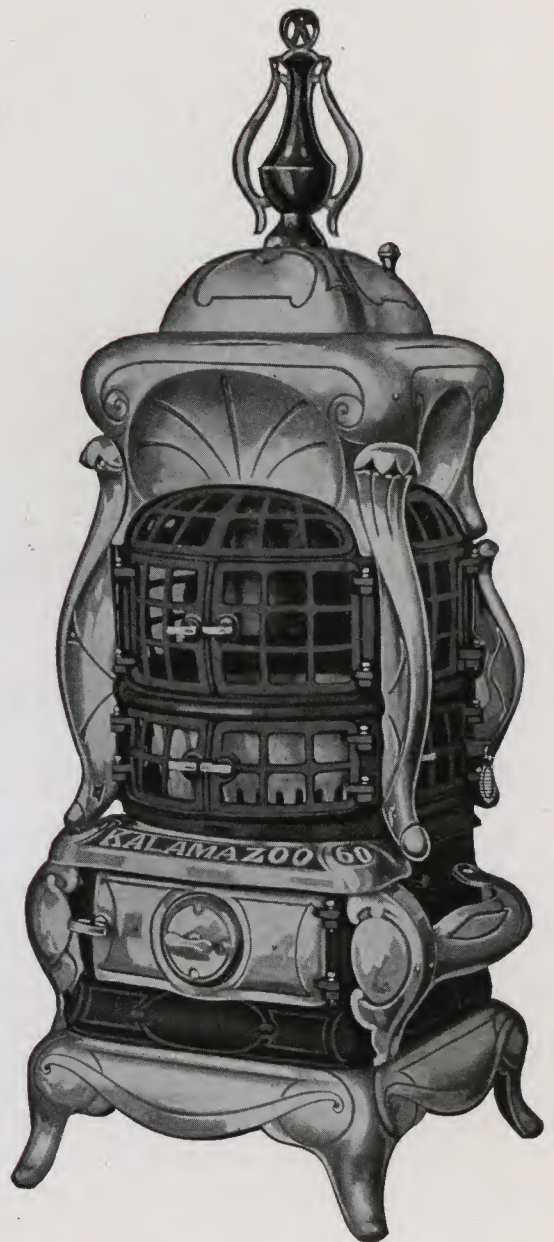

quality at low prices was first established on our complete line of heating and cooking stoves.

Nowhere else will you find such a wide variety of leading styles. Nowhere else are there such handsome patterns with so many valuable features of utility.

And Kalamazoo prices speak for themselves.

Take your choice of any of the 500 styles and sizes shown in our instructive, money-saving, handsomely and truly illustrated catalog. Take 30 days' free trial—360 days' approval test—cash or easy payment terms—money-back guaranty—and we pay the freight. There is no reason in the world why you should pay the dealer nearly double our price sometimes for the stove or range you want.

Here we show only two of our hundreds of styles. A postal request will bring our catalog free. Make your choice, send your order, and we will ship it the day we get it. No delay, no freight to pay, lots of money saved and sure satisfaction or your money comes back without argument. See page 2 of this book for our guaranty. That applies to everything we sell.

The Kalamazoo Malleable Range—Leads Them All!!

Use Our Heating Service

Special Catalog on Kalamazoo Furnaces

Two Styles—Pipe or Pipeless (One Register Furnace)

Also Plans for Installing Furnace,
by Experts—Free

OUR FURNACE CATALOG illustrates and describes heating plants for every size building from a cottage to a large church or school. Kalamazoo heat engineers have solved the problem of an even, dependable, fuel-saving heat, without dirt and hard work. Complete particulars of how you can save on installation as well as first cost—all mailed free on request. Let our experts plan the best heating system to suit your particular case.

Write for our furnace proposition. Send us a rough pencil outline of your house or building floor plans, with measurements of rooms, and our chief draftsman will make you a set of blue prints free for your furnace installation, and quote prices with freight paid to your railroad station. Just use any ordinary piece of scratch paper and rough out the rooms, doors and closets as you would if you were describing your house to us. We will take your sketch and information and work out a plan that will get heat to every room when you want it—and will save you fuel money. These blue prints will not cost you a cent.

Special Catalog on Gas Ranges—FREE

You will be surprised and pleased with the 96 styles of Kalamazoo Gas Stoves. Their quality, their design, their prices will emphasize the many advantages to you of dealing the Kalamazoo way. Kalamazoo Gas Stoves and Ranges have more features of convenience and economy—due to our patented hot blast oven bottom, ease of cleaning and handsome appearance combined—than any other gas range. Whatever Kalamazoo you choose will cost you much less than the ordinary kind of equal size.

SHALL WE SEND THE CATALOG?

County _____ P. O. Address _____

R. R. Station _____ State _____

If you wish to deposit the purchase price in a local bank of your own choice, please have your banker fill out and sign this certificate. YOU SEND IT TO US WITH YOUR ORDER. This certificate is to be used when buying under Plan No. 3

Certificate of Deposit B

Certificate of Deposit

Town _____ State _____

KALAMAZOO STOVE COMPANY, Date _____
Kalamazoo, Mich.

Mr. _____ has deposited \$ _____

_____ with us for payment of a Kalamazoo Kabinet.

We agree to hold the money during a thirty days' preliminary trial of this kabinet. The trial dates from the time of the receipt of the kabinet by the purchaser. If at the end of that time the purchaser has not returned the same, this money is to become the property of the Kalamazoo Stove Company, and we will remit the purchase price to you promptly by New York, Chicago or St. Louis draft *without charge*. If the kabinet is returned to you, you are to notify us promptly upon receipt of the railroad shipping receipt showing this to be the case, and instruct us to refund the money without delay, returning this certificate of deposit at the same time.

This deposit is subject to draft at the end of the thirty days' trial, and all expense of remittance and collection is to be paid by the depositor.

(Signed) _____

Name of Bank

Name of Bank Official

TO THE BANKER:—This is a straightforward business proposition, perfectly fair to the depositor and this Company, therefore we cannot accept this certificate if any erasures or changes are made. We would be pleased to have you consult your Commercial Rating Book as to our responsibility and inform the person who presents this certificate as to our financial standing.

TERMS OF PURCHASE ARE MADE UNDER

PLAN No. 1. And I enclose with this order \$.....in.....
State form of remittance

or

PLAN No. 2. And the money \$.....is sent to the FIRST NATIONAL BANK OF KALAMAZOO.

or

PLAN No. 3. And the purchase price is deposited in the.....Bank of.....
Name of bank Name of town

If you desire to use our Factory Credit Plan, fill in the above order blank for the kabinet or table you want, using the credit price as shown by the credit price list, sign the order, and be sure to answer the following:

What merchants or business men in your community can you refer to.....

Upon receipt of this at our office, and we find your credit references satisfactory, we will send the proper time-payment blank, showing the amount to be paid down and the exact amount to be paid each month.

Name..... Shipping Point.....
(Write plainly)

County..... State.....

My P. O. Address is.....County.....State.....

The name of the railroad on which my shipping point is located.....

CONDITIONS. Within thirty days after the arrival of the kabinet I will set it up according to the directions. It is understood and agreed that I am to have the free use of the same for thirty days from the time I receive it. If this thirty days' preliminary trial is satisfactory then the purchase money becomes the property of the Kalamazoo Stove Company. At the end of that time, if I do not find it as represented, I agree to notify the Kalamazoo Stove Company immediately, and if they can not correct the imperfections, I will recrate it and deliver to the railroad freight agent at the station named above. I will take the usual freight receipt from the railroad and send it to you. When the freight receipt is received showing the return of the kabinet in good order, except such evidence of wear as would result from its use during the preliminary trial period, you agree to return the full amount of money, which I paid you or deposited, at once, free of all charge.

PRICES. The prices quoted on the inside of back cover of this catalog are to your present railroad shipping point. On shipments to be made elsewhere, prices must be obtained by giving us name of town and state to which the goods are to be shipped.

Now, if further use of this kabinet within 360 days from date of shipment should develop any imperfections, or other defects, I will notify the Kalamazoo Stove Company, and if the fault can not be corrected to my entire satisfaction, then the Kalamazoo Stove Company agrees to return the purchase money as soon as I ship it back.

WE DO NOT SELL COOKING UTENSILS

Now—Let These Undisputed Facts Decide You

YOU can not buy a finer cabinet than the Kalamazoo. You can pay much more. But even at the highest prices you can not get the Kalamazoo solid, rigid construction of upper and lower sections—complete frames of steel angles and steel bands with steel walls welded in—so perfectly united that each section is made one piece.

Even at the highest prices you can not get the Kalamazoo finish inside and out in deep, double coating of pure white enamel so evenly applied by patent process, each coat baked on under high temperature.

When you buy the Kalamazoo you buy lifetime service—the Heirloom Cabinet—and beauty equal to service.

When you order the Kalamazoo you are certain of prompt shipment. Our immense facilities enable us to put your cabinet in your kitchen just as fast as railroads can bring it. And we guarantee its arrival in perfect condition. Your cabinet is crated and waiting for you.

And when it stands in your kitchen you will have the satisfaction of knowing you have made a saving of \$5 to \$20 on the price you would have to pay for even the next best all-metal cabinet. You make this saving because you buy direct from the factory, at the wholesale factory price.

You will know—because you can see for yourself—that you have all the sanitary aid to your kitchen work and the protection to your cooking materials and cooking utensils that human science can build into a cabinet. No other one thing that you can put into a kitchen does more to realize your ideas of sanitation than the Kalamazoo Kitchen Cabinet.

Finally you have the satisfaction of knowing that your cabinet comes to you backed by a company whose reputation for quality products and square dealing is world-wide. Nearly 300,000 customers of the Kalamazoo Stove Company know this. Thousands and thousands of these have bought of us regularly for many years.

This reputation is back of our 30 days' free trial offer—back of our offer to you of 360 days' approval test—and is re-enforced by our \$100,000 bank bond.

With this opportunity to put the Kalamazoo Kitchen Cabinet in your home, we know you will agree with our customers in all parts of the country that it pays to buy "A Kalamazoo Direct to You."

Why not select *your* cabinet now and fill out and mail your order blank today?

Very truly yours,

Kalamazoo Stove Company
